1

Let's take an example of car buyer, start adding an element using the button ⊕ .
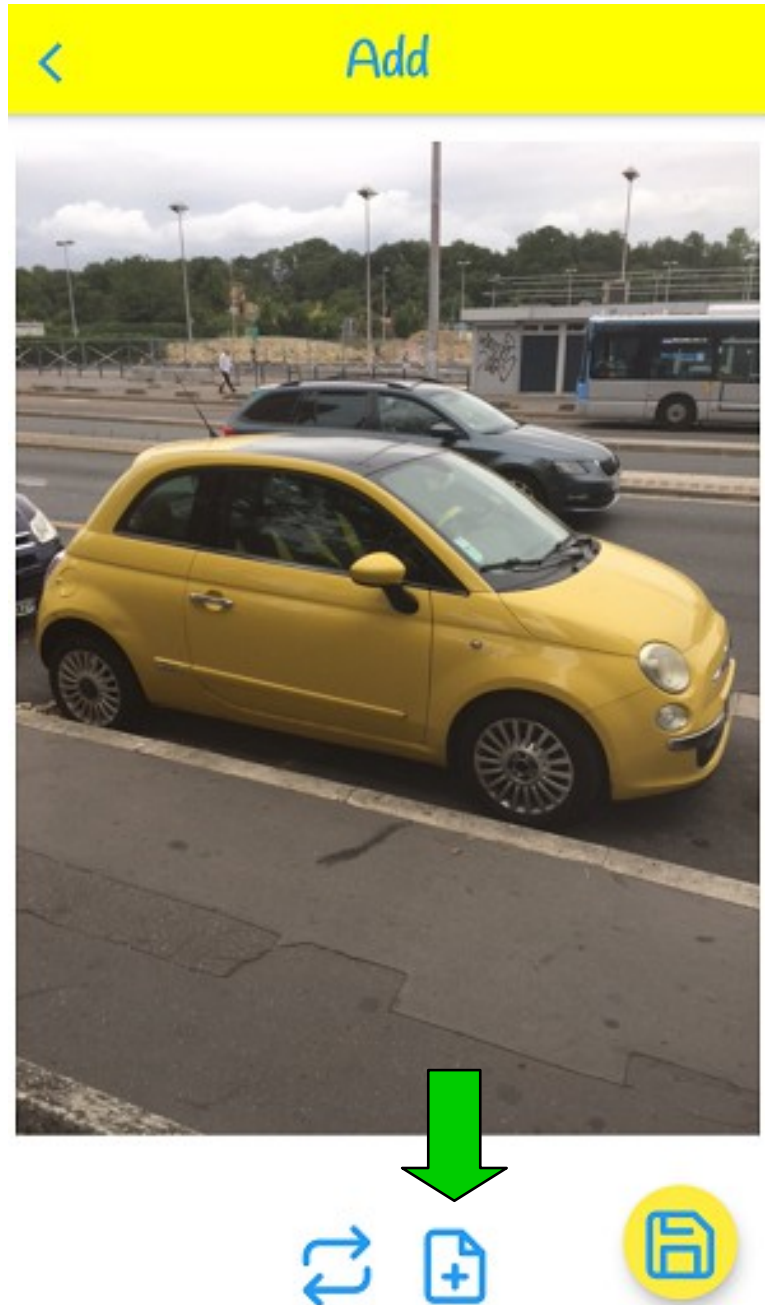

2

Camera is open, you can zoom out/in on it 🔍⊖ 🔍⊕ and take a photo.

3

Once the photo has been taken, you can add note by this button 🗋. Or save it directly 💾. Also , you can re-take it ⇄ . .
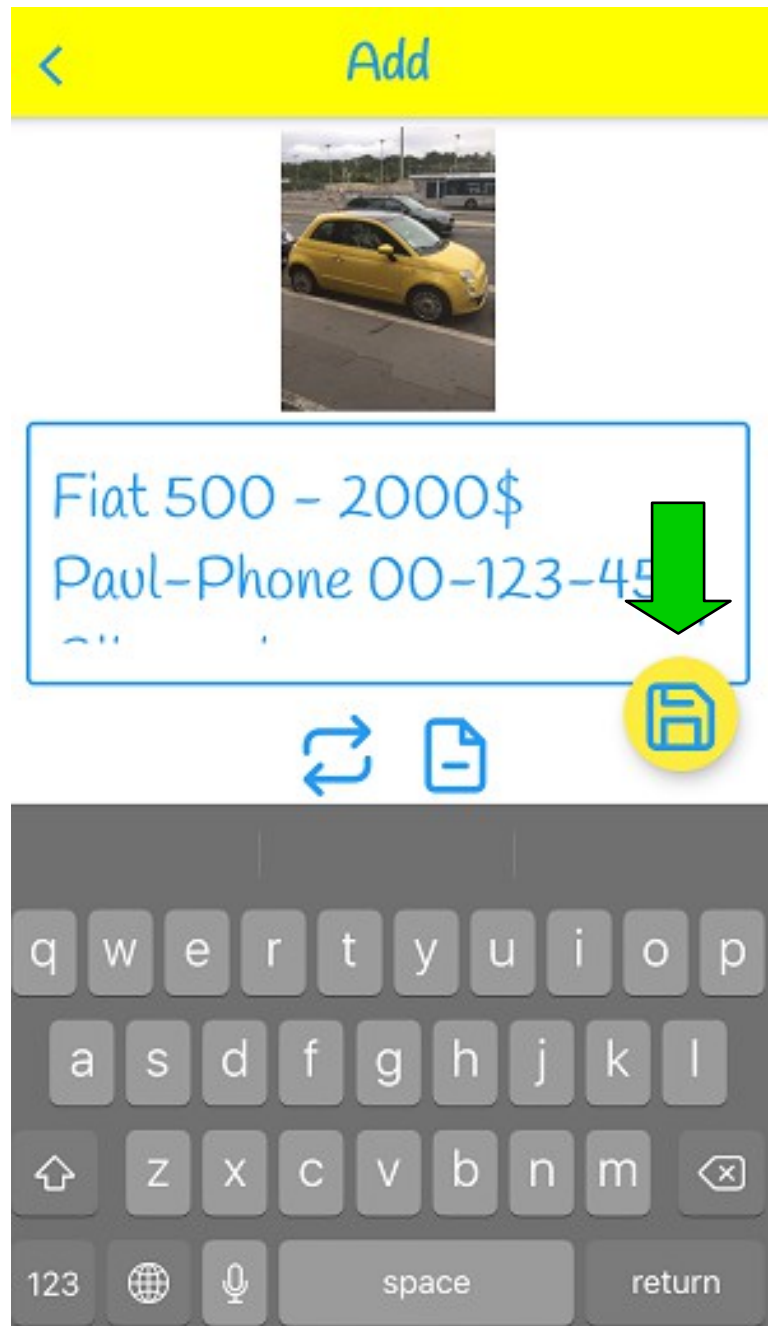

4

At this step, a simple note is added and you can remove it 🗎.

5

Element is complete, it can be saved.

6

Last photo and note are saved, you can add others as you want, they will be listed.

7

With one-press on photo note is displayed and date of last creation or modification.

8

With long-press on photo buttons 🗑 for delete (with double-press), edit and sharing are displayed.

9

You can share your photoRemembers with you relations using others apps.
